### **FOR IMMEDIATE RELEASE**

## **AO: Rapid Inventory Achieves QuickBooks Gold Developer Status**

**CENTENNIAL, CO. March 22, 2012** - AccuCode, Inc. is proud to announce that AO: Rapid Inventory has been awarded Gold Developer status in the Intuit® Online Marketplace, the highest level offered by the Intuit Developer Network (IDN). AO: Rapid Inventory, formerly known as Warehouse Management ES, is an inventory management solution specifically built to provide unparalleled integration with QuickBooks accounting software.

AO: Rapid Inventory was designed as a joint project between AccuCode and QuickBooks during 2007-2008. The goal was to create a seamlessly integrated Inventory Management system for QuickBooks. "AccuCode was provided with unprecedented access to the QuickBooks product managers and software developers, which resulted in a very tightly integrated inventory management solution that is unlike anything else in the QuickBooks Marketplace," said Kevin Reynolds, the AO: Rapid Inventory Product Director. AO: Rapid Inventory is compatible with the U.S. versions of QuickBooks Pro, Premier, and Enterprise.

According to the Intuit® Online Marketplace, "Gold Developer Applications are the highest-rated solutions and have been tested and proven to work with QuickBooks." Additionally, QuickBooks Gold developers "have undergone an extensive testing and approval process to ensure that all of the applications found on Intuit Marketplace are

quality software products that seamlessly integrate with QuickBooks.” All QuickBooks Gold Developers have passed the QuickBooks Technical Review, which is administered by an independent third-party to ensure the application meets Intuit’s rigorous requirements for integrating with QuickBooks and other product functionality. In addition, Gold Developers have also performed well on an extensive customer survey conducted by a third-party.

As a Gold Developer Application, AO: Rapid Inventory provides small and medium sized companies more control over their business through an inventory management solution that does not remove any functionality from QuickBooks. AO: Rapid Inventory has been listed on the Intuit Marketplace since 2008 and joined the prestigious list of Gold Developers in January, 2012. Reynolds explains, “Achieving the Certified Gold Developer status is an honor for AO: Rapid Inventory and AccuCode. It is a testament to our ongoing commitment and relationship with Intuit®, Quickbooks, and their user community.”

AO: Rapid Inventory also offers an Affiliate Program which enables technology resellers, QuickBooks ProAdvisors, and anyone who works with the millions of businesses who use QuickBooks, to refer AO: Rapid Inventory for a 30% commission. Learn more about the Affiliate Program at [www.rapidinventory.com/quickbooks-inventory-affiliate/](http://www.rapidinventory.com/quickbooks-inventory-affiliate/).

### **About AccuCode, Inc.**
