FOR IMMEDIATE RELEASE

New Unlimited User Pricing Structure for AO: Rapid Inventory, a Cloud-Based Inventory Management System for QuickBooks

AccuCode Inc., developers of AO: Rapid Inventory, has announced a new pricing structure for the unlimited user plan. This plan features unlimited concurrent AO: Rapid Inventory user licenses for an affordable monthly cost.

CENTENNIAL, CO – July 23, 2012 – AccuCode, Inc. is proud to announce a new and improved pricing structure for [AO: Rapid Inventory](#). AO: Rapid Inventory, formerly known as Warehouse Management ES, is an inventory management solution specifically built to provide unparalleled integration with QuickBooks accounting software.

Since its inception, AO: Rapid Inventory has offered a unique and simple pricing structure. While most software applications, like QuickBooks, require a paid user license for every user login and password, AO: Rapid Inventory uses concurrent user licenses. Using concurrent user licenses means that AO: Rapid Inventory customers only pay for the number of users they need to have logged into the system at one time. Each concurrent user license costs \$60 per month for users 1-5, while any additional user license costs \$30 per month. AO: Rapid Inventory has offered an unlimited user plan for larger customers who wanted to be able to have as many users as necessary in the system at the same time. Previously, this plan cost \$1,000 per month and was utilized by several customers. Due to popular demand, AO: Rapid Inventory is proud to announce that the price of the [unlimited user plan](#) has been lowered to just \$500 per month.

AO: Rapid Inventory Product Director, Kevin Reynolds explains, “In an effort to provide our customers with the highest level of service possible, we are excited to launch a new unlimited pricing structure. Rapid Inventory customers asked for it, and now they have it. We expect the new \$500 unlimited license plan will become the norm for most customers.” The new pricing structure follows the successful launch of the new and improved Rapid Inventory website launch in March.

AO: Rapid Inventory is the world’s leading cloud-based inventory management solution for QuickBooks. AO: Rapid Inventory was designed with one goal in mind: to create a

seamlessly integrated inventory management system for QuickBooks. Reynolds explains, “AccuCode was provided with unprecedented access to the QuickBooks product manager and software developers, which resulted in a very tightly integrated inventory management solution that is unlike anything else in the QuickBooks Marketplace.” AO: Rapid Inventory is the only product that offers unparalleled integration with QuickBooks, 100% cloud-based, barcode functionality, and excellent customer service.

AO: Rapid Inventory also offers an Affiliate Program that enables technology resellers, QuickBooks ProAdvisors, and anyone who works with QuickBooks users, to refer customers to AO: Rapid Inventory for a 30% monthly recurring commission. Learn more about the Affiliate Program: <http://www.rapidinventory.com/quickbooks-inventory-affiliate/>.

About AccuCode, Inc.
